Digital Directories

St. Anthony's Hospital
1200 7th Ave. N.
St. Petersburg, FL 33705

Digital directories are one type of digital display system that are seen more and more often nowadays.

[Navigo Suite](#), developed by Interactive Touchscreen Solutions, is one digital software program suitable for digital directories in a wide range of environments. Creative Sign Designs most recently used Navigo Suite for the digital directories at St. Anthony's Hospital and Suncoast Medical Clinic.

These directories act as more than wayfinding. Visitors, volunteers and patients have the ability to print name badges in the addition to maps upon entry, eliminating the need to ask for directions. They can also act as self-service kiosks where patients can independently check-in, speeding up the tedious check-in process and in turn minimizing perceived wait times. These are just a few of the software's capabilities that are most commonly utilized in hospital settings.

The vibrant colors and eye-catching movement in digital display systems do an excellent job of keeping visitors and patients engaged. Therefore, it is the perfect medium for hospitals to advertise any promotions or events. This technology can also be used to broadcast emergency updates and display information such as the date and time.

Featured Project

Eckerd College: James Center for Molecular and Life Sciences

Market: Education

Location: St. Petersburg, FL

When the James Center for Molecular and Life Sciences opened its doors to Eckerd's campus on January 31st, the College wanted to recognize the generosity of its donors, all of whom are alumni. Each donor contributed \$5,000 or more to help realize the vision of the building, thus making a significant impact on the College's future and tomorrow's science leaders.

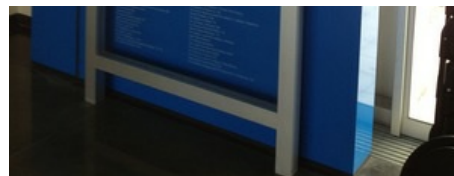

Creative Sign Designs is happy to have had the opportunity to team up with Eckerd to design the illuminated donor wall, "Science Fellows" that features a total of 204 names in the building's central gathering area.

Creative also designed 49 room donor plaques. The background panel of these plaques were made of 1/4" clear acrylic with bamboo laminate and a 1/8" thick, clear acrylic second surface face panel.

In addition to the donor recognition, Creative completed the building's exterior identification consisting of non-illuminated, brushed stainless steel channel lettering as well as interior wall lettering for "Wrenn Hall" made of brushed aluminum channel lettering.

To learn more about donor recognition walls and plaques, visit CreativeMailboxDesigns.com or our sister company's website CreativeSignDesigns.com.
