Standard Pedestal-mounted CBU

Featured Product

Standard & Decorative Pedestal-mounted CBUs

When choosing a cluster box unit, you must consider a mounting method. A pedestal mount is one of the most common mounting methods for CBUs.

Freestanding, pedestal-mounted cluster box units are ideal for both residential and commercial developments. For more than 28 years, Creative Mailbox & Sign Designs has been providing decorative and standard pedestal-mounted cluster box units to contractors, developers and property managers.

All of the CBU components including the top and pedestal are approved by the United States Postal Service and are weather proof and corrosion resistant. Powder coated finishes can also protect the unit from scratches and vandalism.

Although standard CBU pedestals are still very common, decorative pedestals can give the CBU a sophisticated finished look.

Centralized Mailbox Locations

Centralized mailbox locations, often found in single-family subdivisions and commercial developments allow for centralized mail delivery. The U.S. Postal Service actually prefers centralized mailbox locations as they can provide delivery and collection services to a number of residences from one central location.

Most often these locations are outdoors and contain several cluster box units (CBUs) in a row. Each unit typically has a compartment for outgoing mail and 1 to 2 parcel lockers. Each CBU mailbox also has a heavy duty lock to prevent mail theft, tampering and destruction.

Creative Mailbox & Sign Designs has certainly seen an increase in centralized mailbox locations in new developments. Most recently we completed centralized mailbox locations for two Meritage Homes developments, [Nova Grove](#) and [Lester Ridge](#) as well as KB Homes development, [Silverleaf](#). Each of these communities chose a similar standard CBU product. Crossing Creek, a new Pulte Homes development in Bradenton, chose a more unique, decorative CBU product for their centralized mailbox location.
